# Find her size *in secret*

**Print at 100% ("Actual size"), never "Fit to page". Then check the bar below: it must measure exactly 50 mm (or a bank card must fit the dashed box).**

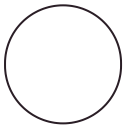

A bank card fits this box exactly
(85.6 × 54 mm) when the print is right.

This bar = 50 mm · 5 cm

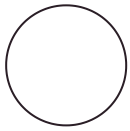

**1. Borrow one of her rings**
One she wears on her ring finger, from the nightstand or the jewelry box.

**2. Lay it on the circles**
Pick the circle whose line sits just inside the ring's inner edge.

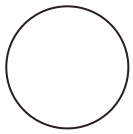

**3. Between two? Take the larger**
We make whole sizes 5 to 11. Wrong anyway? We remake it free.

Sizes: US and Canada · UK, Australia and New Zealand letters · EU circumference in mm (also the size Swiss jewelers use). The ring goes back in her jewelry box, she never knows.

# No ring to borrow? *Use the strip*

Cut along the dashed line. Wrap it around the base of her finger (or yours, where her ring stopped), numbers outward, snug but able to slide over the knuckle. Read where the 0 line meets the ruler: the gold marks show the US sizes, the table gives every half size.

**Measure at the end of the day.** Fingers are a little larger in the evening and when warm.

**Mind the knuckle.** If her knuckle is wide, the ring must still slide over it: take the larger size.

**Same finger, same hand.** The ring finger of the hand she'll wear it on.

**Measure twice.** Paper strip, not string: string stretches.

**The Free Remake.** Wrong size? We remake it once, free, within 60 days, on every ring of the order. Keep the first one.
